Complex Inorganic Color Pigments - Ultramarine & Pigments Ltd |

Welcome to the world of Complex Inorganic Colored Pigments, where chemistry meets creativity to redefine the spectrum of hues. Our innovative pigments bring vibrancy, durability, and versatility to a myriad of applications, setting new standards for color excellence across industries

At the heart of our colored pigments lies a sophisticated chemistry, meticulously crafted to deliver unparalleled color performance. Comprising metal oxides, sulfides, or selenides, these pigments harness the power of transition metals to create captivating colors that endure the test of time

Properties:

Our Complex Inorganic Colored Pigments boast a remarkable array of properties, making them indispensable in various applications:
Colour Stability
Opacity and Coverage
Chemical Inertness
Heat Resistance

Applications:

From paints and coatings to plastics and cosmetics, Complex Inorganic Colored Pigments find their place in a multitude of applications:

Architectural Coatings
Automotive Refinishes
Plastics
Printing Inks
Ceramics

Discover the endless possibilities of color with Complex Inorganic Colored Pigments. Elevate your products and creations with hues that mesmerize, endure, and inspire. Explore our diverse range of pigments and unleash your creativity with colors that leave a lasting impression. Welcome to a world where brilliance knows no bounds |
